

OVERVIEW

Advances in science have had a tremendous impact in the area of biotechnology, helping us grow more disease-resistant plants, using our planet's resources more wisely, and understanding and using genetic engineering to our benefit. In this event, participants conduct research on a contemporary biotechnology issue of their choosing, document their research (student-performed research or a re-creation or simulation of research performed by the scientific community), and create a display. If appropriate, a model or prototype depicting an aspect of the issue may be included in the display. Semifinalist teams create a presentation and are interviewed about their topic.

Biotechnology is “any technique that uses living organisms, or parts of organisms, to make or modify products, improve plants or animals, or to develop microorganisms for specific purposes.” – from *Standards for Technological Literacy*, ITEEA/ITEA, p. 149.

ELIGIBILITY

Preliminary Round: Three (3) teams per state are allowed.

Semifinal Round: A minimum of two (2) and a maximum of three (3) team members participate.

----------	-----------------------------------	------------------------------------	--------------------------------------

Evaluators: Using minimal (1-4 points), adequate (5-8 points), or exemplary (9-10 points) performance levels as a guideline, record the scores earned for the event criteria in the column spaces to the right. The X1 or X2 notation in the criteria column is a multiplier factor for determining the points earned. (Example: an "adequate" score of 7 for an X1 criterion = 7 points; an "adequate" score of 7 for an X2 criterion = 14 points.) A score of zero (0) is acceptable if the minimal performance for any criterion is not met.
